

# Summary of Health Issues in South Africa

Thursday, 28<sup>th</sup> April 2016

The seizure of illegal products claiming to be treatment for diseases ranging from diabetes, heart disease, cancer and viral infections is being organised by Medical Control Council inspectors. These products were allowed to sell such products up and until 2013. Investigations were entered into the validity and viability of these illegal products, such results proved these products did not meet the necessary requirements.

Any further innovations, importation of new products have been blocked and the industry brought to a grinding halt.
